USER INSTRUCTIONS

To ensure safe and proper use of this blender, carefully read the instructions below and keep this manual for future reference. Read this manual before using the blender.

- This blender is compatible with **USB-B connector** chargers and power banks.
- Do not use the blender for purposes other than those intended.
- This appliance is not suitable for children, **without parental supervision.**
- If the USB cable or plug is damaged, stop using the blender immediately.
- Avoid contact between the USB cable and sharp or high-temperature surfaces.
- Do not touch the plug with wet hands. Always unplug by holding the plug itself rather than pulling on the cable.
- Never immerse the blender in water or any other liquid.
- Do not clean with boiling water.
- Do not disassemble the blender. If malfunction occurs, contact an authorized service centre.
- Ensure the blender is correctly assembled before turning it on.
- The blade is sharp-handle with care when installing, removing, or cleaning it.

Warnings:

- Failure to follow operating instructions may result in injury or product damage.
- Incorrect usage may cause harm to people, property, or the appliance itself.
- Never open the lid while the blender is operating.
- Avoid touching rotating parts at all times.
- If the blender becomes jammed, turn off the power and remove any obstructions before restarting.
- Do not exceed 2/3 of the bottle's capacity when filling with food or liquid.
- This blender cannot chop meat, nuts, or beans directly, as this may damage the motor and reduce the appliance's lifespan.

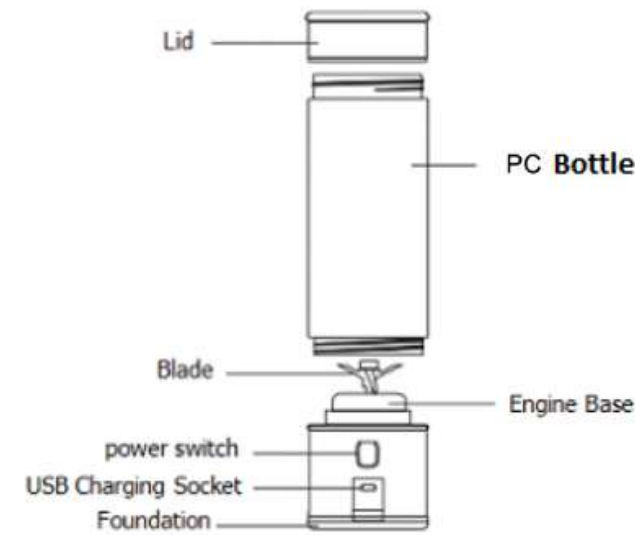

“-” : Ready to use
“o” : Power cut off

After completing the blending or cleaning process, switch the bottom safety switch to the "O" position. Before the next use, switch the safety switch to the "-" position.

PRODUCT SPECIFICATIONS

| Specification | Details |
|---------------|---------------------|
| Model | BW03 |
| Capacity | 400ml |
| Power | 126W |
| Motor | 7.4V |
| Rated Voltage | 7.4V |
| Motor Speed | 15,000 - 16,000 RPM |
| Input Power | 5V, 2A |

DESCRIPTION OF PARTS

CHARGE

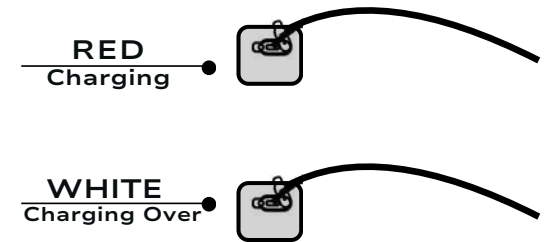

Battery Capacity: 2600mAh × 2

Compatible with USB adapters (≤2A), power banks, and car chargers.

Charging Process:

- Insert the USB cable into the socket at the base of the blender.
- Connect the other end to a USB power source.
- Red light = Charging. White light = Fully charged.

Do not operate the blender while charging.

HOW TO USE

| | | | | |
|----------|----------|----------|----------|----------|
| <p>1</p> | <p>2</p> | <p>3</p> | <p>4</p> | <p>5</p> |
|----------|----------|----------|----------|----------|

After the blending process, open the lid, and pour the blended drink into a glass.
Rinse the jar immediately after use for easy cleaning.

INDICATOR LIGHT INSTRUCTIONS

- Starting the Blender: Double-click the power button. The blender will run for 45 seconds before stopping automatically. A white indicator light will remain on while the blender is running.
- Charging: When connected to a power source via USB:
 - Red light on: Charging in progress.
 - White light on: Fully charged.
- Incorrect Assembly: If the bottle is not attached properly, the red light will flash five times to indicate an error.
- Operation Blockage: If the motor stops due to jammed food, the red and white lights will flash alternately for ten times.
- Low Battery Warning:
 - When the battery is nearly depleted, the red light will remain on for five seconds.
 - If water is added below the blades, the machine will stop for protection after five seconds, and the red light will flash three times.

OPERATING INSTRUCTIONS

Blending Process:

- Cut fruits into small pieces (1.5cm - 2cm). Remove seeds and peels.
- Add fruits and liquid (water or milk) into the bottle.
- Double-click the power button to start blending.
- The blender will stop automatically after 45 seconds.

Assembly Instructions:

- Ensure the waterproof rings are properly positioned on the lid and blade base.

- Secure the bottle to the blade base by twisting clockwise until fully locked.
- Press the power button once—if the indicator light turns white, the assembly is correct.

CLEANING INSTRUCTION

- Detach the bottle from the base.
- Rinse the bottle and lid with water.
- Wipe the blender body with a damp cloth—avoid water entering the USB socket or power switch.

TROUBLESHOOTING

| Problem | Possible Cause | Solution |
|--|---------------------------------------|--|
| Blender does not start (red light blinks) | Bottle not screwed on properly | Securely attach the bottle and try again |
| Blender does not work (red light stays on for 5 sec) | Battery is empty | Charge the blender before use |
| Blender stops automatically | Overloaded or reached 45-second limit | Restart the blender after adjusting contents |
| Red & white lights flash alternately for 10 sec | Motor is jammed | Remove obstructions and restart |
| Leakage | Silicone ring not properly installed | Reinstall the silicone ring correctly |
| Smoke or overheating | Continuous use for too long | Let the blender cool for 30-60 minutes before restarting |
