VACUUM CONTAINER

(BW05)

DC 5V, 3W ULTRA-LOW POWER
CONSUMPTION, LOW-NOISE DC MOTOR,
10L, ABS FOOD GRADE PLASTIC

HOUSEHOLD USE ONLY

USER INSTRUCTIONS

To ensure safe and proper use of this electrical appliance, please read and follow the instructions below carefully.

- This product is compatible with **USB-C connector** chargers.
- Operate the appliance only within a temperature range of 3°C to 40°C.
- Do not immerse the main unit in water or any other liquid. Do not rinse it under running water. Clean only with a damp cloth.
- Keep the appliance out of the reach of children.
- Children should not use this appliance without adult supervision.
- Do not operate the appliance in an inverted position.
- Do not store items exceeding a temperature of 60°C inside the container.
- This appliance is designed for storage use only. Avoid placing it in an oven or toaster.
- The container is made of food-grade ABS material, ensuring safe food storage.
- Due to vacuum pressure during use, the lid and container may slightly contract and will return to their original shape after deflation. This does not affect functionality.
- This product is intended for household use only.
- Charge the appliance every 30 days for optimal performance. If used frequently, charge it every 20 days.

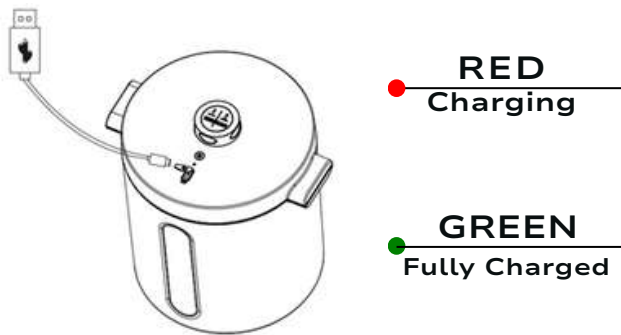

- When storing the vacuum container for an extended period, fully charge it before storage and keep it in a dry place. Avoid prolonged exposure to direct sunlight.
- The estimated charging time for this product is approximately 4 hours

PRODUCT SPECIFICATIONS

Specification	Details
Product Name	Vacuum Rice Container
Model	BW05
Dimensions	310 × 206 × 310 mm
Rated Voltage	5V DC
Rated Power	3W (Ultra-low power consumption)
Motor Type	Powerful low-noise DC motor
Vacuum Box Capacity	10L
Material	Food-grade ABS plastic
Vacuum Function	Low-oxygen and low-pressure vacuum storage to inhibit bacterial growth and prevent corrosion
Automatic Vacuum	Automatically activates vacuum function every 12 hours

CHARGING THE DEVICE

- 1. Before first use, fully charge the device following the instructions below.
- 2. Use only a DC 5V 1A/2A adapter and a Type-C charging cable. The charging process takes approximately 4 hours.
- 3. While charging, the red indicator light remains on. Once fully charged, the green indicator light turns on. After disconnecting from the charger, the indicator light turns off after a 1-second delay.

TURNING ON THE DEVICE

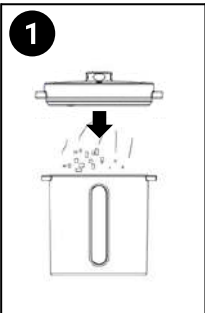

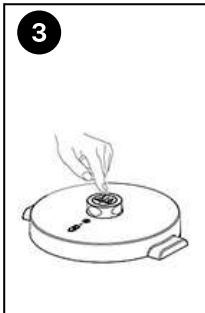

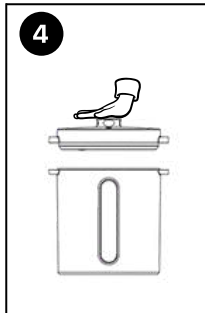

- Upon receiving the product, it will be in power-off mode. To turn it on, press and hold the power button on the lid for 2 seconds. The green and red indicator lights will alternately flash five times, and the device will enter working mode.

- To start the vacuum process, press the vacuum switch. The green indicator light will remain on for 3 minutes while the vacuum pump is running. After the process is complete, the green light will flash five times and turn off, indicating that vacuuming is finished.

PRESS for 2sec

HOW TO USE

			
1 Place the material inside the container, close the lid, and ensure it is tightly sealed with no gaps.	2 Press down firmly on the lid for 5 seconds to ensure a secure seal.	3 Turn on the device, then press the vacuum button to initiate the vacuum process.	4 To remove stored materials, press vacuum button. The vacuum seal will release automatically, lid gets opened

NOTE :

The device automatically activates the vacuum function for 30 seconds every 12 hours to maintain vacuum conditions. The green indicator light remains on during vacuuming and flashes five times before turning off once the process is complete.

CLEANING

- The vacuum container lid contains internal electronic components and must not be washed with water to prevent damage. It is recommended to clean it with a dry cloth.
- The vacuum container should not be washed with water. Use a dry cloth to wipe it clean.

INDICATOR LIGHT GUIDE

1. Powering on (vacuum switch off): Green and red indicator lights flash alternately five times.
2. Powering on (vacuum switch closed): Green indicator light flashes five times.
3. Pressing the power button in working mode:
 - a. Green light stays on for 5 seconds (battery sufficiently charged).
 - b. Red light stays on for 5 seconds (battery low, needs charging).
4. Low battery warning: Red indicator light flashes five times before the device shuts down.

CHECKING BATTERY POWER

1. Press the power button once:
 - If the green light remains on for 5 seconds, the battery is sufficiently charged.
 - If the red light remains on for 5 seconds, the battery is low and needs to be charged immediately.
2. Battery status cannot be checked in power-off mode, and the indicator lights will not display.

LOW BATTERY WARNING

1. When the battery voltage drops below 3V, the red light will flash five times as a charging warning, and the product will automatically shut down.
2. Use only a DC 5V 1A/2A adapter and a Type-C charging cable to recharge the product. After connecting it to power, press and hold the power button for 2 seconds to restart the device.
3. Once restarted, the product can be used again.
4. The product can operate while charging.
